INSTRUCTIONS TO LEARNERS

Respond to all items

Responses must be written in the space provided only.

Item 1.

At the end of 2022, Uganda reported that hepatitis had killed 1250 people, Ebola and AIDS-5200 due to AIDS. The report explained cause of each disease and its effect on the different human body organs and systems. Extremely high infection rates of cassava crops by leaf mosaic disease was also reported. For each disease, Ugandans were sensitized on symptoms and mode of transmission but did not include prevention measures.

Task.

Write the key information on each disease based on the report and suggest possible measures of prevention. **(20 scores)**

END

[illegible]

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
